MENNEKES congratulates:
50 years of container refrigeration innovation at Carrier

This year, Carrier Transicold is commemorating the 50th anniversary of the front-wall refrigeration system design that helped revolutionize the global transport of perishable and frozen goods via container shipping. Container refrigeration has advanced over the years and Carrier Transicold has led the industry with innovations to improve environmental sustainability, cargo protection, performance and efficiency.

MENNEKES congratulates Carrier Transicold on this success story. It’s one that this family company from Germany has been actively supporting for decades in supplying its reefer plug on Carrier Transicold container refrigeration units. Under the rugged demands of use on ships and in container terminals, the MENNEKES plug’s reputation as a leader in quality and innovation proves itself.

In Rotterdam, Netherlands, at this year’s Intermodal Europe show, the leading exhibition and conference for the transport and container industry, MENNEKES honors this achievement with the Golden Container Plug award, which not only celebrates 50 years of Carrier Transicold innovation but also the 5 millionth MENNEKES container plug that was delivered to Carrier Transicold earlier this year.

Many congratulations to Carrier for their milestone anniversary. MENNEKES is looking forward to many more exciting years of cooperation.
