

Wall mounted receptacle  
Part no. 21361A

- screw terminals
- X-CONTACT®
- highly heat resistant contact carrier
- nickel plated contacts
- products with pilot contact: part no. + index P

Technical specifications

|                           |                                                                           |
|---------------------------|---------------------------------------------------------------------------|
| Ampere                    | 63 A                                                                      |
| Poles                     | 5 p                                                                       |
| Voltage                   | 400 V                                                                     |
| Clock position            | 6 h                                                                       |
| Hertz                     | 50-60 Hz                                                                  |
| Connection technology     | Screw terminals                                                           |
| Contact                   | highly heat resistant contact carrier, nickel plated contacts, X-CONTACT® |
| Protection type           | IP 67                                                                     |
| Weight                    | 1057 g                                                                    |
| Declaration of Conformity | EAC                                                                       |
